

Banana Pudding Cake

1 box yellow cake mix

eggs, oil and water called for in cake mix directions

2 3.4-oz. packages instant banana pudding

4 c milk

1 8-oz. carton cool whip, thawed

20 vanilla wafers, crushed

Make cake according to package directions for a 9 x 13 pan. Cool 5 minutes.

Beat pudding and milk until smooth. Let sit (to slightly thicken) for 2 minutes.

Meanwhile, poke holes in cake a half an inch apart using wooden spoon handle. Pour pudding over cake and spread evenly. Chill. When ready to serve, spread cool whip over pudding layer. Sprinkle crushed vanilla wafers* on cool whip and cut into squares. Store in refrigerator.

*Only sprinkle on cake pieces being served immediately; otherwise, vanilla wafers will soften.
